The Episcopal Church Foundation
ECF – Endowment Management

Sample Active/Passive Portfolio Performance

70/30 (Growth) and 60/40 (Balanced)

Equities to Fixed Income

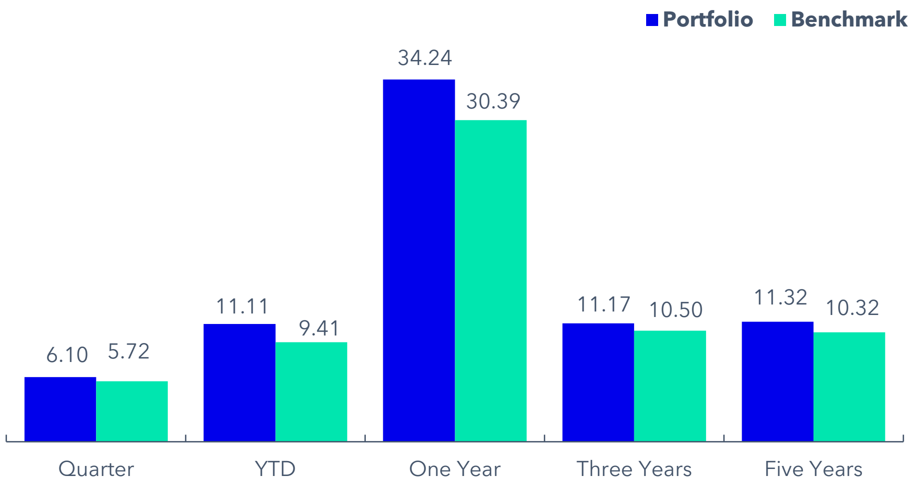
2nd Quarter 2021

ecf
EPISCOPAL CHURCH FOUNDATION

Following are sample account portfolios using State Street Global Advisors investment strategies. Performance is compared to a blended benchmark that reflects the portfolio's strategic asset allocation. The allocation table shows the tactical overlays that have been applied to the portfolios based on current market conditions.

Blended Growth – Passive and Active
Benchmark Target – 70% Equities, 30% Fixed Income

Total Return (%)



All returns greater than one year are annualized.
Custom benchmark consists of: 23% S&P 500, 5% Russell 2000, 5% S&P 400 Mid Cap,
15% MSCI EAFE, 8% MSCI Emerging Markets, 4% S&P EPAC Small Cap, 2.5% DJ US Select REIT, 2.5% DJ Gbl Select REIT, 5% BBG Roll Select Commodity, 15% BBG BC-Aggregate Bond, 5% BBG BC-US TIPS, 5% US HY Custom BB/B, and 5% JPM EMBI Gbl Diversified.

Source: SSGA. This material is solely for the private use of the Episcopal Church Foundation per their request and is not intended for public dissemination. Past performance is not a guarantee of future results. Performance returns for periods of less than one year are not annualized. The performance reported is net of mutual fund and ETF fees, but gross of relationship fees. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in US dollars. Allocations, characteristics, and weightings are as of the date indicated, are subject to change, and should not be relied upon as current thereafter. The "Custom Benchmark" is created by SSGA and may be different for different accounts. For additional information regarding these benchmarks please contact your Investment Officer. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income. Blended returns are based upon estimates and reflect subjective judgments and assumptions. These results were achieved by means of a mathematical formula and do not reflect the effect of unforeseen economic and market factors on decision-making.
The Blended returns are not necessarily indicative of future performance, which could differ substantially.

Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit respective funds website for most recent month-end performance. Shares of the SSGA funds are not insured by the FDIC or by another governmental agency: They are not obligations of the FDIC nor are they deposits or obligations of or guaranteed by State Street Bank and Trust Company. The SSGA funds pay State Street Bank and Trust Company for its services as custodian, transfer agent and shareholder servicing agent and pays SSGA Funds Management, Inc., an affiliate of State Street Bank and Trust Company, for investment advisory services. State Street Global Markets, LLC, Member FINRA, SIPC, is Distributor for all SSGA Funds. Third-party registered products are distributed by third-party broker-dealers. Performance returns for periods of less than one year are not annualized. The gross expense ratio is the fund's total annual operating expenses ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus. The index returns are unmanaged and do not reflect the deduction of any fees or expenses.

The index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income.

Important Disclosures

This material is solely for the private use of the Episcopal Church Foundation per their request and is not intended for public dissemination.

Investing in foreign domiciled securities may involve risk of capital loss from unfavorable fluctuation in currency values, withholding taxes, from differences in generally accepted accounting principles or from economic or political instability in other nations. Investments in emerging or developing markets may be more volatile and less liquid than investing in developed markets and may involve exposure to economic structures that are generally less diverse and mature and to political systems which have less stability than those of more developed countries.

Investing in REITs involves certain distinct risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of credit extended. REITs are subject to heavy cash flow dependency, default by borrowers and self-liquidation. REITs, especially mortgage REITs, are also subject to interest rate risk (i.e., as interest rates rise, the value of the REIT may decline).

Investing in high yield fixed income securities, otherwise known as junk bonds, is considered speculative and involves greater risk of loss of principal and interest than investing in investment grade fixed income securities. These Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.

Increase in real interest rates can cause the price of inflation-protected debt securities to decrease. Interest payments on inflation-protected debt securities can be unpredictable.

Bonds generally present less short-term risk and volatility than stocks, but contain interest rate risk (as interest rates rise bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.

Government bonds and corporate bonds have more moderate short-term price fluctuations than stocks, but provide lower potential long-term returns.

Companies with large market capitalizations go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

Investments in small and mid-sized companies may involve greater risks than in those of larger, better known companies.

Investing in commodities entail significant risk and is not appropriate for all investors. Commodities investing entail significant risk as commodity prices can be extremely volatile due to wide range of factors. A few such factors include overall market movements, real or perceived inflationary trends, commodity index volatility, international, economic and political changes, change in interest and currency exchange rates.

Important Disclosures

There are risks associated with investing in Real Assets and the Real Assets sector, including real estate, precious metals and natural resources. Investments can be significantly affected by events relating to these industries.

The information provided does not constitute investment advice and it should not be relied on as such.

All information has been obtained from sources believed to be reliable, but its accuracy is not guaranteed.

There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such.

The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent.

ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns.

Investing involves risk including the risk of loss of principal.

Asset Allocation is a method of diversification which positions assets among major investment categories. Asset Allocation may be used in an effort to manage risk and enhance returns. It does not, however, guarantee a profit or protect against loss.

Diversification does not ensure a profit or guarantee against loss.
